THE ECO-FRIENDLY UMBRELLA

Global Recycled Standard

The future is Green

Disposable umbrella? No, thanks.

RE-CYCLED MATERIALS

All the umbrellas of the Perletti Green line are made with handles and details in natural biodegradable wood and with RPET fabrics, that comes from the recycling of plastic bottles.

RE-USE GUARANTEE

The quality, strength and reliability of our products guarantees regular and long-lasting reuse

RE-DUCE WASTE

More use of recycled materials, more guarantee of durability, less impact on the environment. Here is the equation of our philosophy.

ECO-FRIENDLY STYLE

A clever mix of natural patterns and ecological details: this is what being eco-friendly means to us. Because when style becomes eco-sustainable, the future turns green.

R-PET

from plastic

the bottles are cleaned

reduced to filaments

then pressed and melted

until becoming high quality spun fibers

PFCFREE WECARE

to fabric

closure with button

THE BEAUTY

of the natural world lies in the

DETAILS.

Handle made from natural biodegradable wood
